

Personal Portfolio Website

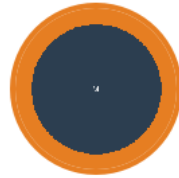

Final Output — Reference Screenshots

This is what your finished 3-page project should look like once built. Use these screenshots as a visual reference while writing your own HTML and CSS code. Your version does not need to look identical — colors, images, and wording can be your own.

Mansi

Computer Engineering Student | Web Development Enthusiast

Hello, I'm Mansi

I am a **Computer Engineering Student** who loves *Web Development*. I am currently *learning HTML, CSS and JavaScript*, and building small projects to practice what I learn. My favourite subject is **Programming**.

This website is a practice project built using [HTML](#) and [CSS](#) to showcase what I've learned so far.

My Hobbies

- Reading Books
- Listening to Music
- Coding

Favourite Subjects

1. HTML
2. CSS
3. JavaScript

About Me & My Skills

A Bit More About Me

I enjoy **building things** and I am *always curious* about how websites work. I believe in consistent practice over rushing through topics, and I try to stay **focused** on one concept at a time.

(This paragraph uses small text just to show the tag.)

Fun fact " water is H₂O and my favourite equation from school is $x^2 + y^2 = z^2$.

My confidence level before this course: ~~Beginner~~ My confidence level now: Improving Every Day

My Skills
